Lý Hồng Phương Ân

Network Intern

0978241945 lyhongphuongan@gmail.com https://github.com/miraclestg Thành phố Hồ Chí Minh

SUMMARY

Final-year Cybersecurity student at Ho Chi Minh City University of Foreign Languages and Information Technology (HUFLIT) with a strong interest in networking and system security. Possessing foundational knowledge of TCP/IP, OSI model, and basic routing and switching concepts, along with hands-on practice using Linux and Kali Linux for basic penetration testing tasks.
Demonstrated ability to learn quickly and improve through self-study, reflected in significant GPA growth over recent semesters. Familiar with basic network analysis tools and concepts such as port scanning and system-level operations. Seeking a Network Intern position to gain hands-on experience in Data Centre environments, work with real-world network systems, and further develop technical skills in networking, system operations, and cybersecurity.

EDUCATION

Ho Chi Minh City University of Foreign Languages and Information Technology (HUFLIT) 2023 - 2027

Major: Cybersecurity

GPA: 3.4 / 4.0 (expected 3.47)

- Significant improvement in GPA over recent semesters, demonstrating strong self-learning ability and adaptability
- Relevant coursework: Computer Networks, Operating Systems, Information Security

SKILLS

Networking	Understanding of TCP/IP and OSI Knowledge of ports, protocols, and network communication Basic routing and switching concepts
Operating Systems	Familiar with Kali Linux environment
Security	Basic penetration testing concepts Understanding of bind shell & reverse shell Basic reverse engineering concepts
Tools and technologies	Nmap – Network scanning & port enumeration Wireshark – Packet analysis & traffic inspection Burp Suite – Web vulnerability testing (basic) sqlmap – Automated SQL injection testing Volatility – Basic memory analysis x32dbg - Basic reverse engineering NetBeans – Basic Java development
Soft skills	Strong willingness to learn Teamwork and communication Problem-solving mindset Careful and detail-oriented
Languages	English – Intermediate (reading technical documents, basic communication)

PROJECTS

Reverse Engineering 2025 - Present

Chocolate Factory CrackMe - Reverse Engineering

- Analyzed 64-bit PE binary using x64dbg & PEStudio
- Reverse-engineered 4 workshops: S-Box, SIMD dot-product, bit-level hash, CRC-16
- Developed Python scripts to recover full Golden Ticket: Ch0c-M1lk-CrMe-ak9U

Penetration Testing 2025 - Present

Mộc Việt Furniture Store - Web Application Penetration Testing

- Performed SAST scan with Checkmarx on Spring Boot application (~103k LOC)
- Identified & patched critical vulnerabilities: SpEL Injection (RCE) and DOM XSS
- Reduced Risk Score from 86 to 61

Digital Forensics & Steganography 2025 - 2026

Steganography Detection & Extraction - Digital Forensics

- Extracted hidden data from BMP, PNG, TIFF, WAV, JPG using zsteg, StegSolve, Audacity & hex analysis
- Successfully recovered messages via LSB, spectrogram Morse, Bacon's Cipher and other techniques

INTERESTS

- Networking and Data Centre systems
- Cybersecurity and penetration testing
- Web development as a personal interest
- Exploring software technologies such as Docker and CI/CD
